Dear Mr. Stein,

You'll be welcome if our medical conditions do not deteriorate more.

My wife had four major operation in six weeks when she was 86 and then she spent six months in nursing homes. I was hospitalized for pneumonia and the nursing ho which I was sent just would not discharge me. I finally discharged myself. After three months! And I'm now almost 87.

I suggest that you phone in advance.

I'm not familiar with the modern superhighways but in coming up from down there one that goes near Hagerstown, I think 81, may be easier than fighting all the Washington Beltway traffic.

I am in dialysis Monday, Wednesday and Friday mornings and it takes all morning but it also tires me so I'm usually home for the rest of the day.

Please remember also that I retire exceptionally early because I get up early enough to require that. This also means you can get here early if you'd like to.

Sincerely,

Harold Weisberg
